

Dear Fourth Grade parents and students,

My name is Mrs. Lauren Peirce and I am the fourth grade teacher. Fourth grade is an exciting year filled with many new and challenging academic experiences.

Students will increase their knowledge of money, multiplication, division, matter, magnetism, and maps. They will also learn about the regions and unique characteristics of the United States, explore electricity, and discuss how we can live out God's teachings in everyday life.

We will read, write, experiment, share, and participate in a variety of projects and assignments. Every day will present many chances to take academic risks, and I will be there to support my students every step of the way!

We are a fourth grade family that respects and encourages each other. I know this will be a great year!

Sincerely,

Mrs. Peirce
