

## **GRADE 6**

Welcome to 6th Grade! My name is Mr. Furtado and I'm the 6th Grade Homeroom Teacher. I teach middle school Math and Social Studies to grades 6, 7, and 8. I also teach 6th grade Religion.

In 6th Grade we learn about the relationship between God and his people in Religion. In Math we add, subtract, multiply and divide with decimals and fractions. We begin to learn about integers and do some Geometry as well. In Social Studies we learn about Ancient Civilizations and Empires.

In 7th Grade we continue to learn about integers and work on solving equations and inequalities. We begin to deal with decimals and fractions as rational numbers. We also continue with Geometry and get into the fundamentals of Algebra. In Social Studies we explore the world by studying the physical geography, history and cultures of the different areas and continents of the world.

In 8th grade Math we study the foundations of Algebra. We work on different operations with rational numbers. We solve multi-step equations and inequalities. We work with polynomials and continue with more in-depth geometry. In Social Studies we study U.S. History beginning with the Civil War. We then continue studying U.S. History through World War I and World War II and up to the Gulf War.

My goal is to have you enjoy learning Math and Social Studies throughout your years at Sacred Heart School and beyond. I look forward to having a great year with you all!
